# Anatomy Multiple Choice Questions

**1. Which subdivision of anatomy most specifically focuses on development before birth?**
A) Gross anatomy.
B) Microscopic anatomy.
C) Developmental anatomy.
D) Embryology.

**2. Which of the following subdivisions of anatomy is the study of invisible parts using imaging techniques?**
A) Gross anatomy.
B) Microscopic anatomy.
C) Radiologic.
D) Embryology.

**3. Which of the following subdivisions of anatomy is the study of structures using a microscope?**
A) Gross anatomy.
B) Histology.
C) Radiologic.
D) Embryology.

**4. Which of the following subdivisions of anatomy is the study of the position of a deep structure of the body in relation to the skin surface?**
A) Radiological
B) Clinical
C) Surface
D) Applied

**5. Which of the following means a group of cells with similar structure and functions?**
A) Tissue.
B) System.
C) Organ.
D) Organism.

**6. Which of the following means a group of organs working together to perform a specific function?**
A) Tissue.
B) System.
C) Organ.
D) Organism.

**7. Which of the following is the basic living unit of the body?**
A) Tissue.
B) System.
C) Organ.
D) Cell.

**8. Which anatomical plane divides the body into upper and lower parts?**
A) Coronal
B) Sagittal
C) Median sagittal
D) Transverse

**9. The median (midsagittal) plane divides the body into:**
A) Upper and lower parts
B) Front and back parts
C) Equal right and left halves
D) Unequal right and left parts

**10. The sagittal plane divides the body into:**
A) Equal right and left halves
B) Unequal right and left portions
C) Front and back parts
D) Upper and lower parts

**11. The coronal (frontal) plane divides the body into:**
A) Right and left parts
B) Anterior and posterior parts
C) Upper and lower parts
D) Equal halves

**12. The transverse (horizontal) plane divides the body into:**
A) Right and left parts
B) Front and back parts
C) Upper and lower parts
D) Equal halves

**13. All the following are true regarding anatomical position Except:**
A) Person is standing
B) The arms are close to trunk
C) Face faces forwards
D) Palms directed backwards

**14. According to the anatomical position, the little toe is …… to the big toe.**
A) anterior
B) posterior
C) medial
D) lateral

**15. In the anatomical position, the palms are facing:**
A) Backwards
B) Downwards
C) Forwards
D) Upwards

**16. In the anatomical position, the thumbs are directed:**
A) Medially
B) Laterally
C) Posteriorly
D) Inferiorly

**17. In the anatomical position, the lower limbs are:**
A) Wide apart
B) Close together
C) Crossed
D) Bent

**18. In the anatomical position, the eyes and face are looking:**
A) Downwards
B) Upwards
C) Forwards
D) Sideways

**19. The supine position means:**
A) Lying on the abdomen
B) Lying on back
C) Sitting upright
D) Standing

**20. The prone position means:**
A) Lying on back
B) Lying on the abdomen
C) Lying on side
D) Sitting

**21. Anterior means:**
A) Behind
B) In front
C) Above
D) Below

**22. Posterior means:**
A) In front
B) Behind
C) Above
D) Below

**23. Superior means:**
A) Near to the upper end
B) Near to the lower end
C) Near to the median plane
D) Away from the median plane

**24. Inferior means:**
A) Near to the upper end
B) Near to the lower end
C) Near to the median plane
D) Away from the median plane

**25. Medial means:**
A) Nearer to the median plane
B) Away from the median plane
C) Near to the skin
D) Away from the skin

**26. Lateral means:**
A) Nearer to the median plane
B) Away from the median plane
C) Near to the skin
D) Away from the skin

**27. Proximal means:**
A) Away from the root of the limb
B) Nearer to the root of the limb
C) Near to the skin
D) Away from the skin

**28. Distal means:**
A) Away from the root of the limb
B) Nearer to the root of the limb
C) Near to the skin
D) Away from the skin

**29. Superficial means:**
A) Away from the skin
B) Towards the skin or body surface
C) Near to the median plane
D) Away from the median plane

**30. Deep means:**
A) Away from the skin or body surface
B) Towards the skin or body surface
C) Near to the median plane
D) Away from the median plane

**31. Unilateral means:**
A) On both sides of the body
B) On one side of the body
C) On the same side
D) On opposite sides

**32. Bilateral means:**
A) On one side of the body
B) On both sides of the body
C) On the same side
D) On opposite sides

**33. Ipsilateral means:**
A) On opposite sides
B) On the same side
C) On one side
D) On both sides

**34. Contralateral means:**
A) On the same side
B) On opposite sides
C) On one side
D) On both sides

**35. Flexion means:**
A) Increases the angle between bones
B) Decreases the angle between bones
C) Moves away from the midline
D) Moves toward the midline

**36. Extension means:**
A) Increases the angle between bones
B) Decreases the angle between bones
C) Moves away from the midline
D) Moves toward the midline

**37. Abduction means:**
A) Moves toward the midline
B) Moves away from the midline
C) Decreases the angle
D) Increases the angle

**38. Adduction means:**
A) Moves away from the midline
B) Moves toward the midline
C) Decreases the angle
D) Increases the angle

**39. Which of the following best describes the position of the leg in relation to the thigh?**
A) Proximal
B) Distal
C) Medial
D) Lateral

**40. Which of the following best describes the position of the arm in relation to the wrist?**
A) Proximal
B) Distal
C) Medial
D) Lateral

**41. Which of the following is the most superiorly located?**
A) Mouth
B) Eye
C) Neck
D) Heart

**42. Which of the following best describes the position of the lungs in relation to the ribs?**
A) Superficial
B) Deep
C) Superior
D) Inferior

**43. Which of the following is the lowest level of human organization?**
A) Chemical
B) Cellular
C) Tissue
D) Organ

**44. Which of the following is the highest level of human organization?**
A) Chemical
B) Cellular
C) Tissue
D) Organism

**45. Which of the following is the most superficial layer?**
A) Superficial fascia
B) Deep fascia
C) Epidermis
D) Dermis

**46. The deep fascia is nearly absent in which of the following sites?**
A) Palm
B) Sole
C) Face
D) Neck

**47. Which of the following is NOT TRUE concerning skeletal muscles?**
A) Mostly attached to the skeleton.
B) Acts voluntarily.
C) Supplied by autonomic nerves.
D) Supplied by somatic nerves.

**48. Which of the following is NOT TRUE concerning cardiac muscle?**
A) Present in the wall of the heart.
B) Acts involuntarily.
C) Supplied by autonomic nerves.
D) Supplied by somatic nerves.

**49. Which of the following is NOT TRUE concerning smooth muscle?**
A) Present in the walls of blood vessels and viscera.
B) Acts involuntarily.
C) Supplied by autonomic nerves.
D) Supplied by somatic nerves.

**50. Which type of bones are the tarsal bones?**
A) Irregular
B) Short
C) Long
D) Flat

**51. Which type of bones is the scapula?**
A) Short
B) Long
C) Flat
D) Pneumatic

**52. Which type of bones is the humerus?**
A) Long, axial
B) Long, appendicular
C) Short, axial
D) Short, appendicular

**53. Which type of muscle is voluntary?**
A) Cardiac muscle
B) Smooth muscle
C) Skeletal muscle
D) All of the above

**54. Which of the following is part of the axial skeleton?**
A) Clavicle
B) Femur
C) Sternum
D) Scapula

**55. How many cervical vertebrae are there?**
A) 5
B) 7
C) 12
D) 4

**56. How many thoracic vertebrae are there?**
A) 5
B) 7
C) 12
D) 4

**57. How many lumbar vertebrae are there?**
A) 5
B) 7
C) 12
D) 4

**58. The sacrum consists of ……. fused vertebrae.**
A) 3
B) 4
C) 5
D) 7

**59. How many pairs of ribs are there?**
A) 10
B) 12
C) 14
D) 24

**60. Which ribs are called "floating ribs"?**
A) Ribs 1-7
B) Ribs 8-10
C) Ribs 11-12
D) Ribs 7-12

**61. How many parts does the sternum consist of?**
A) 2
B) 3
C) 4
D) 5

**62. The only bone of the arm is:**
A) Radius
B) Ulna
C) Humerus
D) Clavicle

**63. Which bone is located laterally in the forearm?**
A) Ulna
B) Radius
C) Humerus
D) Carpals

**64. Which bone is located medially in the forearm?**
A) Ulna
B) Radius
C) Humerus
D) Carpals

**65. How many carpal bones are there?**
A) 5
B) 7
C) 8
D) 14

**66. How many phalanges are in one hand?**
A) 5
B) 8
C) 14
D) 28

**67. The only bone of the thigh is:**
A) Tibia
B) Fibula
C) Femur
D) Patella

**68. Which bone is located medially in the leg?**
A) Fibula
B) Tibia
C) Femur
D) Patella

**69. Which bone is located laterally in the leg?**
A) Fibula
B) Tibia
C) Femur
D) Patella

**70. How many tarsal bones are there?**
A) 5
B) 7
C) 8
D) 14

**71. Which of the following is a flat bone?**
A) Vertebrae
B) Scapula
C) Carpal bones
D) Femur

**72. Which of the following is an irregular bone?**
A) Ribs
B) Vertebrae
C) Sternum
D) Humerus

**73. The shaft of a long bone is called:**
A) Epiphysis
B) Diaphysis
C) Metaphysis
D) Epiphyseal plate

**74. The proximal or distal end of a long bone is called:**
A) epiphysis
B) diaphysis
C) periosteum
D) epiphyseal plate

**75. The medullary cavity contains:**
A) Cartilage
B) Bone marrow
C) Synovial fluid
D) Ligaments

**76. The shoulder girdle consists of:**
A) Clavicle and humerus
B) Scapula and humerus
C) Clavicle and scapula
D) Clavicle, scapula, and humerus

**77. The pelvic girdle consists of:**
A) Sacrum and coccyx
B) Hip bones
C) Femur and hip bones
D) Sacrum and hip bones

**78. Which bone is NOT part of the appendicular skeleton?**
A) Clavicle
B) Scapula
C) Vertebra
D) Femur

## Answer Key

| Question | Option | Correct answer |
|---|---|---|
| 1 | D | Embryology |
| 2 | C | Radiologic |
| 3 | B | Histology |
| 4 | C | Surface |
| 5 | A | Tissue |
| 6 | B | System |
| 7 | D | Cell |
| 8 | D | Transverse |
| 9 | C | Equal right and left halves |
| 10 | B | Unequal right and left portions |
| 11 | B | Anterior and posterior parts |
| 12 | C | Upper and lower parts |
| 13 | D | Palms directed backwards |
| 14 | D | Lateral |
| 15 | C | Forwards |
| 16 | B | Laterally |
| 17 | B | Close together |
| 18 | C | Forwards |
| 19 | B | Lying on back |
| 20 | B | Lying on the abdomen |
| 21 | B | In front |
| 22 | B | Behind |
| 23 | A | Near to the upper end |
| 24 | B | Near to the lower end |
| 25 | A | Nearer to the median plane |
| 26 | B | Away from the median plane |
| 27 | B | Nearer to the root of the limb |
| 28 | A | Away from the root of the limb |
| 29 | B | Towards the skin or body surface |
| 30 | A | Away from the skin or body surface |
| 31 | B | On one side of the body |
| 32 | B | On both sides of the body |
| 33 | B | On the same side |
| 34 | B | On opposite sides |
| 35 | B | Decreases the angle between bones |
| 36 | A | Increases the angle between bones |

| Question | Option | Correct answer |
|---|---|---|
| 37 | B | Moves away from the midline |
| 38 | B | Moves toward the midline |
| 39 | B | Distal |
| 40 | A | Proximal |
| 41 | B | Eye |
| 42 | B | Deep |
| 43 | A | Chemical |
| 44 | D | Organism |
| 45 | C | Epidermis |
| 46 | C | Face |
| 47 | C | Supplied by autonomic nerves |
| 48 | D | Supplied by somatic nerves |
| 49 | D | Supplied by somatic nerves |
| 50 | B | Short |
| 51 | C | Flat |
| 52 | B | Long, appendicular |
| 53 | C | Skeletal muscle |
| 54 | C | Sternum |
| 55 | B | 7 |
| 56 | C | 12 |
| 57 | A | 5 |
| 58 | C | 5 |
| 59 | B | 12 |
| 60 | C | Ribs 11-12 |
| 61 | B | 3 |
| 62 | C | Humerus |
| 63 | B | Radius |
| 64 | A | Ulna |
| 65 | C | 8 |
| 66 | C | 14 |
| 67 | C | Femur |
| 68 | B | Tibia |
| 69 | A | Fibula |
| 70 | B | 7 |
| 71 | B | Scapula |
| 72 | B | Vertebrae |
| 73 | B | Diaphysis |

| Question | Option | Correct answer |
|---|---|---|
| 74 | A | Epiphysis |
| 75 | B | Bone marrow |
| 76 | C | Clavicle and scapula |
| 77 | B | Hip bones |
| 78 | C | Vertebra |
